Chief, Engineering Division OC

25X1

Contract Number XG-1050 with

25X1

MEMO : Memorandum to OC-E from OL/PD/Contract Branch dated March 17, 1955,
same subject.

1. The list of government owned tools submitted by the contractor on subject contract appears to be a complete and accurate list of the tools used under the contract. Specifications and drawings referred to in the subject contract have been delivered by the contractor and are filed within the Office of Communications.

2. The above statement refers only to the tools used in production of the RT-3 transmitter under Contract No. XG-1050 and does not include all government owned tools acquired under contracts PSC-135, XG-540, and/or XG-848. Many of these tools are required for production of items such as the RR-2 radio receiver on Contract XG-848, parts peculiar to the RS-1 on Purchase Order 5841-55, refurbishing of 100 sets of RS-1 equipment, and initiation of a parts peculiar program contemplated in the near future.

3. In view of the above it is requested that settlement of the property phase of Contract XG-1050 be effected by execution of a storage contract and that terms of this contract be such that tools stored thereunder can, when specifically authorized by the contracting officer, be utilized by the contractor in manufacturing component equipments or parts of type RS-1 radio equipment.
